DETAILED ACTION

Response to Arguments

Applicant's arguments filed 07/18/2006 have been fully considered but they are not persuasive. In Yang it is disclosed a drift region 216 under the field isolation region connecting with the channel region and with at least one doped region, a modifying doped region 222, in the substrate at periphery of the at least one doped region where the drift region and the modifying doped region together completely surround the doped regions.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4-6 and 15-18 rejected under 35 U.S.C. 102(b) as being anticipated by Yang (6,306,700).

Regarding Claims 1 and 5, Yang discloses method for forming high voltage devices compatible with low voltage devices on semiconductor substrate where in Fig. 6 it is disclosed a substrate 200, a gate dielectric layer 228 on the substrate, gate 230 on the gate dielectric, a channel region in the substrate under the gate dielectric layer, two doped regions 232a/b in the substrate beside the gate, field isolation regions 220 between the

gate and the doped regions, a drift region 216 under the field isolation region connecting with the channel region and with at least one doped region, a modifying doped region 222, in the substrate at periphery of the at least one doped region where the drift region and the modifying doped region together completely surround the doped regions.

Regarding Claim 2, 15 and 17, the modifying doped region is the substrate at the peripheries of the two doped regions.

Regarding Claim 4, 16 and 18, isolation layer 220 is a FOX layer.

Regarding Claim 6, in column 3, the required concentration value is disclosed.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
